DETAILED ACTION

Status of Claims

- 1. This action is in response to the application filed on 19 October 2001.
- 2. Claims 1-10 have been examined.

Information Disclosure Statement

3. The Information Disclosure Statement filed on 24 November 2003 has been considered. An initialed copy of the Form 1449 is enclosed herewith.

Claim Rejections - 35 USC § 101

- 4. 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requires of this title.
- 5. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The basis of this rejection is set forth in a two-prong test of:
 - (1) whether the invention is within the technological arts; and
 - (2) whether the invention produces a useful, concrete, and tangible result.
- 6. For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and

the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, the recited steps of merely enabling a business model and an arrangement for enabling a business model does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed without the use of any technological apparatus, system or method such as, for example, a computer system, database, electronic circuit, or software application. These steps only constitute a method that is easily attainable without the use of any state-of-the-art devices or techniques.

7. Additionally, claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically, claims 1-10 do not produce a useful, tangible, or concrete result.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's own admissions.

Claims 1-10:

Applicant, in the background of the specification (see at least pages 1-3), discloses the

limitations of claims 1-10. Applicant does not specifically disclose a supporting server, but does

disclose computing devices and the World Wide Web, essentially disclosing a networking

environment. It would have been obvious to one of ordinary skill in the art at the time of the

invention to modify the Applicant's admission to include a server-based computer network

because e-commerce is based on the internetworking of multiple computing devices.
